

Write a program to:

Take two integers a and b

Print:

Sum

Difference

Product

Division

Modulus

Swapping using bitwise operators without using 3 rd variable

To find last 2 digit of the given number

To find middle digit of the number

Write a program to take a five-digit number as input, square the middle digit and print number and the square.

Input Data:

Input an integer: 54623

Expected Output

Square of 6 is: 36

To find last digit of the number

Write a Program to Find the Square Root [formula = $\text{number}^{**0.5}$]

Write a Program to Calculate the Area of a Triangle [formula = $0.5 \times \text{base} \times \text{height}$]

Write a Program to Convert Kilometers to Miles [$1\text{km} = 0.63 \text{ miles}$]

Write a Program to Convert Celsius To Fahrenheit [formula = $(\text{Celsius} \times 1.8) + 32$]

Write a Program to Solve Quadratic Equation [$(a+b)^2$ formula , $(a-b)^2$ formula , a^2-b^2 formula]
